

**Job Title:** AI Engineer

**Company:** fynix Digital

**Location:** Thane, Maharashtra (On-site)

---

 **Ready to build the future with cutting-edge AI? fynix Digital is looking for a passionate AI Engineer to join our innovative team in Thane!**

At **fynix Digital**, we're not just building apps; we're crafting intelligent solutions that solve complex, real-world problems. If you're driven by the challenge of creating sophisticated, AI-driven platforms from the ground up, we want to hear from you.

---

## What You'll Be Doing (Key Responsibilities)

As a key member of our team, you'll be at the heart of our AI development, working on an advanced, agentic platform. Your role will be to:

- **Design and build** scalable backend services and APIs using **Python** and **FastAPI**.
  - **Develop and orchestrate** complex, multi-step AI agentic workflows with frameworks like **LangGraph**.
  - **Integrate** a variety of third-party APIs for robust data acquisition.
  - **Implement** asynchronous task queues (**Celery**, **Redis**) to handle intensive AI processes.
  - **Containerize** applications with **Docker** and manage deployments.
  - **Design and manage PostgreSQL** database schemas and contribute to our knowledge graph systems.
  - **Build and maintain CI/CD pipelines** using tools like GitHub Actions for smooth, automated deployments.
  - **Collaborate** on system architecture to ensure our platform is performant, scalable, and reliable.
- 

## What You Bring to the Table (Qualifications)

### **Required Skills & Experience:**

- **Education:** A Bachelor's degree (BE, B.Tech, BSc) in Computer Science, AI, Data Science, IT, or a related field.
- **Professional Experience:** Proven background as an AI Engineer, ML Engineer, or Backend Developer with a strong AI focus.
- **Python Mastery:** Expert-level proficiency in Python and its core libraries.
- **API Development:** Hands-on experience building robust APIs, especially with **FastAPI**.
- **LLM Orchestration:** Strong experience with frameworks like **LangChain/LangGraph**, including **RAG** integration.
- **Containerization:** **Good** experience with **Docker**.
- **Databases:** Proficiency with SQL databases (especially **PostgreSQL** or **MySQL**).
- **Web Scraping:** A solid understanding of web scraping fundamentals and techniques.
- **Collaboration:** Strong teamwork skills with proficiency in **Git** and **GitHub**. A great project portfolio is a huge plus!

## 🌟 Good-to-Have Skills:

- Strong OOP fundamentals and experience with data validation libraries like **Pydantic**.
  - Knowledge of NLP libraries like **spaCy**.
  - Familiarity with graph databases (e.g., **Neo4j**).
  - Experience with cloud platforms (DigitalOcean, AWS, GCP).
  - Knowledge of MLOps, CI/CD, and **Kubernetes (K8s)**.
  - Understanding of authentication mechanisms like **JWT**.
- 

## Why Join fynix Digital?

- **Impactful Work:** Be a core part of a groundbreaking AI project from its crucial growth stages.
- **Modern Tech Stack:** Work with the latest and greatest tools in the AI and backend world.
- **Growth & Learning:** We foster a collaborative environment where you can grow your skills and career.
- **Competitive Compensation:** We offer a competitive salary and benefits package.
